FARM LANDS for SALE.—The ILLINOIS
CENTRAL RAILROD COMPANY is now prepared to
sell about TWO MILLIONS OF ACRES of

ENTRAL RAILROD COMPANY is now prepared to sell about TWO MILLIONS OF ACRES of

FARMING LANDS,

IN TRACTS OF FORTY ACRES AND UPWARD,

On Long Credits, sell at Low Rates of Ingerest.

These Lands were granted by the Government to sid in the construction of this Railrose, and are a way to be a side of more formal to the content of the side of the portheast to Cairo at the south, and thence to Galena and Dusleith in the extreme north-western part of the State. Most of these lands is immediately on, and within six miles of, the Road, and none are more than lifteen miles distant from it; hence ready and cheep inclities are furnished for transporting their products to any of the Eastern or Southern markets. The great increase of population by immigration, &c., and the consequent rapid growth of flourishing towns and villages on the line of the Road and throughout the State, farnish a substantial and growing home demand for every kind of farm and garden produce.

In the northern and central parts of the State Prairie Lands predominate, interspersed with magnificent groves of oak and other timber; in the southern the timber is more abundant and exceedingly valuable.

The soil is a dark rich mold, from one to five feet in depth, is gently rolling and peculiarly fitted for grazing cattle and sheep, or the cultivation of wheat, Indian corn, etc. The sir is pure and bracing, the climate more beauthy, mild and equable that the forey other part of the Union; while living streams

sheep, or the cultivation of wheat, Indian corn, etc. The sir is pure and bracing, the climate more bealthy, mild and equable than that of any other part of the Union; while living streams and springs of excellent water abound.

Economy in cultivating and great productiveness are the well-known characteristics of lilinois lands. Trees are not required to be cut down, stumps grubbed, or stone picked off, as is generally the case in cultivating new land in the older States. The first crop of indian corn, planted on the newly-broken sod, usually repays the cost of plowing and fencing.

Wheat sown on the newly-turned sod is sure to yield very large profits. A man with a plow and two yoke of oxen will break one and a half to two scree per day. Contrasts can be used for breaking, ready for corn or wheat, at from \$2.50 about the second year.

Second year.

Corn, grain, cattle, etc., will] be forwarded at reasonable rates to Chicago, for the Eastern, and to Cairo for the Southern market.

Bituminous Coal is extensively mined along the Road, and supplies a cheep and desirable fuch, being furthed out, and supplies a cheep and desirable fuch, being furthed out in many points at \$1.50 to \$4 per tun.

The control of the State of the State of the second opened in the late of the State of

water of Summer or the frosts of Winter.

PRICE AND TERMS OF PAYMENT.

The price will vary from \$5 to \$25, according to location, quality, etc. Contracts for deeds may be made until further nodec, stipulating the purchase money to be paid in five annual harial ments—the first to become due in two years from the date of contract, and the others annually thoreafter. The last payment will become due at the end of the sixth year from the date of the contract, and the lands are not subject to taxation till finally paid for.

EXTERSO WILL SE CHARGED AT ONLY THREE PER CENT PER ANNUM.

As a security to the performance of the contract, the first two years' interest must be paid in advance, and it must be understood that at least one tenth of the land purchased shall yearly be brought under cultivation. Twenty per cent from the credit price will be deducted for cash. The Company's construction bonds will be received as eash.

Ready-framed Farm Buildings, which can be set up in a few days, can be obtained from responsible persons.

They will be 12 feet by 20 feet, divided into one living and three bed-rooms, and will cost complete, set up on ground chosen anywhere along the road, \$25 in cash, exclusive of transportation. Larger buildings may be contracted for at proportionate rates. The Company will forward all the materials for such buildings over their road promptly.

It is believed that the price, long credit, and low rate of interest charged for these sands, will enable a man with a few hundred dollars in casa and ordinary industry to make himself independent before all the purchase-money becomes due. In the mean time, the rapid settlement of the country will probably have increased their value four or live-fold. When required, as experienced person with accompany applicants, to give information and aid in electing lands.

Circulars, containing numerous instances of successful farming, signed by respectable and well-known farmers living in the meighborhood of the rallroad lands, throughout the State—also the cost of fencing, price of cattle, expense of harvesting, thrashing, etc., by contract—or any other information—will be cheerfully given on application, either personally or by letter, to English, Frusch or German, addressed to JOHN WILSON, Land Commissioner of the linois Central Rallroad Depot, Chicago, IR.
